ABOUT US

I'm a Freelance Web Developer with 2+ years of experience creating high-quality, responsive websites and exceptional user experiences. Along with web development, I design cards, logos, and advertisement videos to help businesses build a cohesive brand identity. I focus on clear communication and collaboration, ensuring client visions are brought to life and expectations exceeded. My goal is to equip businesses with the digital tools they need to thrive.

PROJECT UNDERTAKEN

Student Record Management System

A scalable system designed to efficiently manage and retrieve student data, utilizing client-server architecture for real-time synchronization and optimal performance.

● **Project Description:**

The system ensures smooth communication between the client interface and server-side database, focusing on security, scalability, and easy management of student records.

● **Technologies Used:**

- Front-End: HTML, CSS (for a responsive and user-friendly interface)
- Back-End: PHP (for dynamic content handling)
- Database: MySQL (for robust data management and storage)
- Server: XAMPP (for local server setup and testing)

➤ **Built a Dynamic Car Service and Tyre Management Website**

A user-friendly platform for booking car services like tyre repair, puncture fixes, and mechanical solutions. Features easy navigation, service booking, secure payments, and an admin panel for managing orders and services.

● **Technologies Used:**

- Framework: GoDaddy Website Builder
- Design: Canva
- Front-End: HTML, CSS
- Back-End: PHP
- Database: MySQL
- Hosting: GoDaddy

● **Website:** sparkstyresandmechanical.com.au

➤ **Developed a High-Performance E-Commerce Website**

Designed and developed a Shopify-based platform for selling car parts, featuring secure user authentication, responsive design, and seamless transactions for an enhanced shopping experience.

● **Website:** bbcarparts.com.au

● **Technologies Used:**

- Platform: Shopify
- Security: User authentication

➤ **Developed an E-Commerce Shopping Website for Girls**

Designed and developed a fully functional e-commerce platform tailored for girls, offering a wide range of products like dresses, and accessories. The website featured a user-friendly interface, seamless navigation, and secure transaction processing for an enhanced shopping experience.

● **Technologies Used:**

- Framework: Laravel (for backend development)
- Front-End: Bootstrap (for responsive and mobile-first design)
- Database: MySQL (for product and user data management)
- Additional Tools: HTML, CSS, PHP
